

Crystal Player

Upgrade your existing TV* or monitor into a fully featured Crystal Display system with our revolutionary Crystal Player. Simply plug in power and internet and the Crystal Player automatically downloads property profiles, posters, animations and showcases them for you!

*TV must support DVI-D or VGA input to be compatible. 16:9 aspect ratio recommended.

SPECIFICATIONS & REQUIREMENTS

Display connection	The Crystal Player provides DVI-D and VGA outputs. A converter may be required if your tv or monitor is not compatible.
Screen aspect ratio	Crystal Player is compatible with letterbox (4:3) or widescreen (16:9) monitors. <i>Widescreen format is highly recommended</i> as some display options are unavailable in letterbox.
Screen resolution	Your TV must support one of the following resolution modes: 1366x768 (High Definition), 1280x768 for widescreen or 1024x768 for letterbox.
Power	240V power required
Orientation	Your screens can be either mounted in portrait (vertical) or landscape (horizontal)
Internet	A network (Ethernet) connection is required at the player
Distance to screen	The video cable between the Crystal Player and the screen must be less than 5m in length. Crystal Display recommends 2.5m length
Installation	The Crystal Player must be uncovered and located in an area with adequate ventilation for cooling.
Warranty	1 year warranty
